Arezoo Ghorbanzadeh

Go Developer Remote

Profile

I am a Go developer with one year of experience building and maintaining efficient and scalable applications. I have a solid foundation in Go, including working with concurrency patterns, interfaces, and channels, to develop reliable software systems. My experience extends to microservices architecture and integrating various databases and messaging systems such as MongoDB, PostgreSQL, KeyDB, Redis, NATS, RabbitMQ, and MySQL. I am also familiar with Node.js and enjoy collaborating with cross-functional teams to deliver practical and high-quality solutions.

Education

Bachelor's IT, University Payam Noor
September 2010 – June 2014

Employment History

Backend Developer
January 2023 – now

- Designed, developed, and maintained backend services in Go, focusing on building efficient and scalable APIs for diverse applications.

- Collaborated with cross-functional teams to optimize performance and ensure the scalability of services.
- Implemented unit tests and participated in code reviews to uphold high standards of code quality and reliability.

Network Engineer & Help Desk Support

September 2020 – July 2023

- Gained 3 years of experience as a Network Engineer and Help Desk Support across two companies.
- Acquired certifications including CCNA, CCNP, Microsoft, Mikrotik, ...
- Provided technical support, managed network infrastructure, and ensured seamless IT operations.
